Professional English for Data Science

dott.ssa Caroline Rosemary Chick

Department of Sociology and Social Research - via Verdi 26

TIMETABLE from 5 October:
Tuesday 16.00 - 20.00, room 6

The updated information on lesson times is available on the piattaforma EasyAcademy platform.

Professional English for Data Science:
The course is reserved for Data Science students and will not be activated if there is not a sufficient number of students.

Registration in a second group will be activated only when the first is full.

The course, which includes 40 hours of lessons and is activated in the 1st and 2nd semester, requires a B2 level of linguistic competence (ref. Common European Framework). For those who do not know their level, it is advisable to take the CLA placement test: http://www.cla.unitn.it/490/test-di-piazzamento.

The course is aimed at providing students with both tools and strategies useful for English in the Data Science field and the opportunity to analyze and write related texts.

The course includes 40 hours of lessons, determines the allocation of 3 credits and is activated in both I and II.

For admission to attendance, linguistic skills above level B2 are required to be proven by means of an international language certification at least level B2, with the passing - by no more than one year of a CLA course at least level B2b or with the attestation of the B2b level through CLA placement test (http://www.cla.unitn.it/490/test-di-piazzamento).

The seminar is aimed at providing students with both tools and strategies useful for English in the Data Science field and for carrying out assigned tasks, commenting on data and presentations. The seminar syllabus will be published through Esse3.

For access, online registration is required as specified below. Participation in the seminar for at least 75% of the hours and the performance of the final exam will result in the award of 3 credits.

Online registration at http://www.sociologia.unitn.it/100/seminari-di-credito until 30/09/2021 (maximum number of participants: 20)
